Allowable Subject Matter

7. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1, 11, 12, 14 and 18:

The primary reason for the allowance of claim 1 is the inclusion of the method steps of: loading files or clips thereof in said loading order and determining total energy consumption caused by the loading until the value of said total energy consumption exceeds the value of the maximum energy consumption. It is this/these features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this/these claim(s) allowable over the prior art.

The primary reason for the allowance of claim 11 is the inclusion of the method steps of: loading files or clips thereof in said loading order and comparing the values determined as functions of the joint probabilities of the files or clips thereof with the threshold value until the value determined as the function of the joint probability of the file or a clip thereof is smaller than the threshold value. It is this/these features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this/these claim(s) allowable over the prior art.

The primary reason for the allowance of claim 12 is the inclusion of: means for loading files or clips thereof and determining the total energy consumption caused by the loading of the files or clips thereof, the means being arranged to load files or clips thereof until the value of the total energy consumption exceeds the value of the maximum energy consumption. It is this/these features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this/these claim(s) allowable over the prior art.

The primary reason for the allowance of claim 14 is the inclusion of the method steps of: means for requesting files or clips thereof and determining the total energy consumption caused by the loading, the means being arranged configured to load files or clips thereof until the value of said total energy consumption exceeds the value of the maximum energy consumption. It is this/these features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this/these claim(s) allowable over the prior art.

The primary reason for the allowance of claim 18 is the inclusion of: loading files or clips thereof and determining the total energy consumption caused by the loading of said files or clips thereof until the value of said total energy consumption exceeds the value of the maximum energy consumption. It is this/these features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this/these claim(s) allowable over the prior art.

Art Unit: 2863

Claims 2-10 and 21 are allowed due to their dependency on claim 1.

Claims 13 are allowed due to their dependency on claim 12.

Claims 17 are allowed due to their dependency on claim 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hoffman et al. US PUB 2002/0107853 teaches a system and method for personalized search, information filtering and for generating recommendations utilizing statistical latent class models.
